The U.S. lift Truck division based in Cleveland has a professional team knowledgeable in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Originally the domestic lift truck market in Korea was an open import enterprise. Korea Machinery Co. Ltd. began in 1960, to import fully assembled forklifts as part of a domestic machinery expansion project. Product sales of these products were initially targeted to state-run corporations, large scale corporations, and the armed forces. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical training became the new focus for enhancing quality and product development.

Home-based lift truck business for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's superior technological advancements combined with sales success placed them in a position of considerable expansion of their lift truck business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to help them in the highly competitive North American materials handling market. This project proved highly lucrative for Daewoo and their forklift sales expanded greatly. In 1984, the company finished development of a new facility to help in producing high end value-added goods for export. In 1993, the corporation had a international sales system and started exporting versions they had developed through in-house expertise, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas marketplaces.
